HOBBIES

Building model airplanes Listening to music Working on cars

PROFILE

I am an experienced Aircraft Mechanic with over 5 years of experience. I have a strong understanding of aircraft systems and how they work together. I am able to troubleshoot and repair aircraft problems quickly and efficiently. I have a high level of attention to detail, which ensures that all repairs are carried out correctly the first time. My excellent communication skills allow me to effectively communicate with other members of the maintenance team, as well as pilots and flight crews.

EMPLOYMENT HISTORY

Aircraft Mechanic at Northrop Grumman, VT

May 2022 - Present

- Installed a new engine in an aircraft: removed the old engine and replaced it with a new one, using hand tools, power tools, and lifting equipment.
- Repaired an aircraft's landing gear: inspected the landing gear for damage, repaired or replaced damaged parts, and tested the landing gear to ensure it was safe to use.
- Replaced an aircraft's windows: removed the old windows and installed new ones, using a variety of hand and power tools.
- Inspected an aircraft's engine: checked all of the engine's parts for wear or damage, and replaced any damaged parts.
- Serviced an aircraft's air conditioning system: checked all of the system's parts for wear or damage, cleaned or replaced dirty parts, and refilled the system with coolant.

Aircraft Mechanic II at Boeing, VT

Aug 2017 - Mar 2022

- Inspected and repaired aircraft systems, including brakes, electrical systems, and landing gear.
- Performed scheduled maintenance on aircraft engines and airframes.
- Replaced damaged or worn parts, such as gaskets, seals, and bearings.
- Inspected aircraft to ensure that they meet safety standards.
- Test-flew aircraft after repairs or maintenance to ensure proper functioning.
