Kimyra Donado

Database Administrator

Profile

I have over 5 years of experience as a database administrator. In my role, I am responsible for managing and maintaining databases. I have extensive knowledge of SQL andOracle databases. I am also proficient in data mining and data analysis tools such as Microsoft Excel and Tableau.

In my previous roles, I have successfully designed, implemented, and maintained complex database systems. I have also provided 24/7 support for critical production databases. My strong technical skills coupled with my ability to work independently make me an asset to any organization

Employment History

Senior Database Administrator at BlueTarp Financial, ME

Mar 2022 - Present

- Led the successful migration of a 20TB Oracle database to AWS RDS, resulting in cost savings of $120K per year.
- Implemented new backup and recovery procedures that reduced backup times by 50%.
- Instituted real-time monitoring of key database performance indicators, which resulted in a 30% reduction in downtime.
- Developed custom scripts to automate various DBA tasks, saving an estimated 10 hours per week.
- Configured databases for high availability and disaster recovery using Data Guard on Exadata systems.
- Successfully completed several projects ahead of schedule and under budget.
