As a Front End Developer, I have over 1 year of experience in designing and implementing user interfaces. I am proficient in HTML, CSS, JavaScript, and jQuery. I have a strong understanding of web standards and accessibility guidelines. In addition to my development skills, I also have excellent communication and problem-solving skills.

Employment History

Lead Front End Developer at Blue State Digital, CT

Jun 2022 - Present

- Led the development of a new website for a major client, resulting in increased traffic and conversions.
- Implemented a responsive design that improved mobile user experience by 50%.
- Developed an AngularJS application that was successfully launched on time and under budget.
- Increased front-end performance by implementing caching and minification techniques.
- Actively participated in code reviews to ensure quality standards were met.
- Created custom directives that saved the company thousands of dollars in developer hours.

Senior Front End Developer at CTC, CT

Sep 2021 - Apr 2022

- Led the development of a web platform that increased conversion rates by 15%.
- Implemented a responsive design for a website that boosted traffic from mobile devices by 20%.
- Developed an e-commerce checkout system that reduced abandoned carts by 25%.
- Wrote front-end code for a social media application that was used by millions of people.
- Created custom animations and interactions using HTML5, CSS3, and JavaScript.
- Worked with back-end developers to integrate APIs and create dynamic data visualizations.

Education

Bachelor of Science in Computer Science at Yale University

Sep 2017 - May 2021

I have learned to program in Java, C++, and Python; to use the Linux operating system; and to use git for version control.
