Profile

I have over three years of experience as a hearing aid specialist. I am passionate about helping people improve their quality of life by providing them with the best possible hearing care. I have a strong knowledge of different types of hearing aids and how to fit them properly for each individual patient. I am also experienced in troubleshooting any issues that may arise with hearing aids. In addition, I regularly provide patients with educational materials on how to take care of their Hearing Aids devices and use them properly.

Employment History

Hearing Aid Specialist at Miracle-Ear, SC

Mar 2022 - Present

- Assisted 50 clients in choosing the right hearing aid based on their individual needs.
- Fitted 100 clients with new hearing aids and programmed them to meet each client's specific amplification goals.
- Provided counseling to 200 individuals and families about how to best manage living with a hearing loss.
- Tested the auditory functioning of 300 patients using both pure-tone audiometry and speech reception thresholds testing.
- Conducted research that led to the development of a new type of digital hearing aid processing algorithm that improved sound quality for users while also reducing feedback problems.
- Wrote an article published in "The Hearing Journal" detailing my findings from above research project.

Hearing Aid Specialist Trainee at Beltone, SC

Sep 2019 - Jan 2022

- Successfully completed training program and became a certified hearing aid specialist.
- Able to conduct audiometric testing with 95% accuracy.
- Successfully fitted 100 patients with hearing aids.
- Maintained a 97% success rate for patient satisfaction with fittings.
- Conducted 50 group informational seminars on the importance of early detection and treatment of hearing loss.
