Profile

I am a journeyman machinist with 4 years of experience. I have worked in various industries and have gained a strong understanding of the trade. I am skilled in operating lathes, milling machines, and other machinery. I am also proficient in reading blueprints and drawings to create parts that meet specifications. I possess excellent problem-solving skills and can troubleshoot issues as they arise. I work well independently or as part of a team, and always take pride in my workmanship.

Employment History

Journeyman Machinist at Cummins, AR

Apr 2022 - Present

- Trained and mentored 3 apprentices, increasing department productivity by 15%.
- Cut cycle time for widget production by 33%, saving the company \$100,000/year in labor costs.
- Developed and implemented a new quality control system that reduced defects by 25%.
- Created a custom jig that increased efficiency of part X assembly by 20%.
- Wrote standard operating procedures (SOPs) for 4 machine shop processes.

Machinist at John Deere, AR

Jul 2018 - Feb 2022

- As a machinist, I was responsible for operating and maintaining a variety of machines in order to create parts for various projects.
- I operated lathes, milling machines, drill presses, and other similar machinery in order to fabricate metal parts.
- I regularly performed preventive maintenance on all machines in my area in order to keep them running smoothly.
- Whenever there was a problem with one of the machines, I troubleshoot and repaired it as quickly as possible.
- On several occasions, I completed complex projects ahead of schedule by working overtime or coming in on weekends.
- My coworkers often came to me for help because they knew that I was an expert machinist who could get the job done right.
