PROFILE

I am a Maintenance Engineer with over 5 years of experience in the field. I have worked on a variety of projects, both big and small, and have gained a wealth of knowledge in the process. I am an expert at troubleshooting and repairing mechanical systems, as well as performing preventative maintenance tasks. In addition to my engineering skills, I also have strong project management abilities. This makes me an ideal candidate for any organization that is looking for someone who can not only keep their machines running smoothly, but also handle other aspects of facility upkeep.

EMPLOYMENT HISTORY

● Maintenance Engineer at Cummins, OR

May 2022 - Present

- Successfully performed preventative maintenance on 100% of production equipment, resulting in a decrease in unscheduled downtime by 25%.
- Worked with engineering staff to develop new methods for tracking maintenance metrics, which improved the efficiency of the department by 15%.
- Created a training program for new maintenance technicians which shortened their time to proficiency by 50%.
- Successfully completed projects ahead of schedule and under budget on average of 20% of the time.
- Led a team of 12 technicians in resolving a critical issue that was affecting production.

● Maintenance Engineer II at Daimler, OR

Aug 2017 - Mar 2022

- Successfully completed preventative maintenance on 100 pieces of equipment per week.
- Repaired at least 75% of all equipment breakdowns within 24 hours.
- Successfully implemented a new maintenance schedule that reduced downtime by 20%.
- Trained 2 junior engineers in best practices for equipment maintenance.
- Worked with vendors to establish preferred pricing for spare parts and repairs.
