

Marlene Oettinger

Medical Sonographer

Profile

As a certified and experienced medical sonographer, I have gained extensive knowledge in performing diagnostic ultrasound procedures. With over three years of experience working in this field, I am confident in my abilities to provide quality patient care. My strong attention to detail ensures that all images are captured accurately, while my compassionate nature puts patients at ease. I am an asset to any healthcare team and would be proud to contribute my skills towards providing excellent patient care.

Employment History

Medical Sonographer at California Medical Imaging, CA

Mar 2022 - Present

- Successfully completed over 1,000 diagnostic ultrasounds.
- Maintained a 98% patient satisfaction rating.
- Identified numerous abnormalities and communicated findings to physicians.
- Saved the hospital \$50,000 per year by increasing efficiency in the ultrasound department.
- Trained 4 new medical sonographers.
- Received "Employee of the Month" 3 times.

Sonographer at Medical Sonography Solutions, CA

Jul 2019 - Jan 2022

- Successfully completed over 500 diagnostic ultrasounds independently.
- Performed an average of 10-15 obstetric scans per day and successfully identified potential concerns for high-risk pregnancies to be referred to MFM specialist.
- Successfully performed 20+ Level II OB ultrasound studies weekly including biometry, amniotic fluid volume assessment, growth curves, nuchal translucency measurements, umbilical cord Dopplers and placental location determination.
- Maintained a 98% patient satisfaction rate as measured by post-visit surveys.
- Demonstrated expertise in performing difficult or challenging nonobstetrical exams such as pelvic sonograms with transvaginal approach on obese patients or abdominal/pelvic sonograms on uncooperative children under the age of 5 years old resulting in successful completion of study 100% of the time.

Education

Associate of Science in Diagnostic Medical Sonography at Glendale Community College

Aug 2015 - May 2019

I have learned how to operate a sonogram machine, how to take pictures of different parts of the body, and how to communicate with patients.
