## Profile

I have over five years of experience teaching middle school math, and I absolutely love it. I am passionate about helping my students understand the material and see the value in what they are learning. My favorite part of teaching is seeing my students succeed - whether that's getting a good grade on a test or simply understanding a concept that they were struggling with.

## Employment History

### Middle School Math Teacher at Eureka Math, AR

Apr 2022 - Present

- Successfully taught a group of 30 seventh grade students the state standards for math over the course of one school year.
- Taught concepts such as fractions, decimals, percents, basic geometry, and negative numbers in an engaging and effective manner.
- Created lesson plans that were both rigorous and fun for students.
- Differentiated instruction based on students' learning styles and needs.
- Maintained a positive relationship with parents and guardians by keeping them updated on their child's progress.

### Assistant Middle School Math Teacher at Khan Academy, AR

Aug 2017 - Feb 2022

- Assisted in the development of a new math curriculum for the district that was piloted in my school.
- Led professional development for teachers on best practices for teaching math.
- Created engaging and differentiated lesson plans that helped students meet state standards.
- Worked with small groups of struggling students to help them catch up to their grade level.
- Collaborated with other teachers and staff to create a positive and supportive learning environment.
