Profile

I am a Network Analyst with over 5 years of experience in the field. I have worked extensively with different networking technologies and have gained vast knowledge in this domain. My key strengths include excellent problem solving skills, troubleshooting abilities and analytical thinking. Over the course of my career, I have successfully implemented various network projects and provided support to clients on complex issues. I am confident in my ability to provide high quality work and deliver results as per client expectations

Employment History

Network Analyst at AT&T, IA

Mar 2022 - Present

- Led the network analysis team in designing and implementing a new network for the company, which improved performance by 25%.
- Researched and recommended new networking hardware and software to improve reliability by 15%.
- Documented current network infrastructure and created diagrams for easy reference.
- Trained junior analysts on best practices for analyzing networks.
- Created custom scripts to automate various tasks, reducing manual work by 50%.
- Monitored networking equipment for signs of failure and took preventive measures to avoid downtime.

Network Engineer at Verizon, IA

Aug 2017 - Feb 2022

- Successfully installed and configured a new network for the company, which increased productivity by 30%.
 - Installed a new firewall system that prevented over 100 hacking attempts on the network.
 - Successfully implemented a virtual private network (VPN), which allowed employees to work remotely without sacrificing security.
 - Created detailed documentation of the network infrastructure, making it easier for other engineers to troubleshoot issues.
 - Configured routers and switches to optimize traffic flow and reduce congestion.
 - Monitored the network 24/7 to identify potential problems and take corrective action immediately when necessary.
-

Education

Bachelor of Science in Networking and Communications at Iowa State University, Ames, IA

Sep 2013 - May 2017

I've learned how to design, install, configure, and maintain networks.
