

Easton Rusca

Network Engineer

Profile

I am a Network Engineer with over 4 years experience in the industry. I have worked on many different projects, including designing and implementing network solutions for small businesses and enterprise companies. I have a strong knowledge of networking protocols and technologies, and my skills include troubleshooting complex problems, configuring routers and switches, and managing network security. I am also proficient in Linux administration tasks. I am seeking a position where I can use my skills to help solve challenging technical problems and contribute to the success of an organization

Employment History

Network Engineer at Google, MT

Apr 2022 - Present

- Successfully installed and configured a new network for the company, which increased productivity by 30%.
- Successfully implemented a VoIP system for the company, which saved \$5000 per month in phone costs.
- Successfully designed and implemented a wireless network for the company, which increased employee satisfaction by 20%.
- Created documentation for all aspects of the network, including diagrams, IP address lists, and troubleshooting procedures.
- Regularly performed maintenance on the network to ensure optimal performance and uptime.
- Resolved any networking issues that arose in a timely manner.

Network Engineer II at Apple, MT

Jul 2018 - Feb 2022

- Successfully implemented a new VOIP system for the company, which increased call quality and decreased monthly costs by \$2,000.
- Worked with vendors to upgrade networking equipment in all 12 locations across the country, resulting in an overall decrease of network downtime by 75%.
- Successfully troubleshooted and resolved over 1,500 complex technical issues relating to networks and hardware.
- Created comprehensive documentation for all aspects of the company's network infrastructure.
- Collaborated with other departments to ensure smooth rollout of new applications and updates that required changes to the network configuration.
- Participated in on-call rotation to provide 24/7 support for mission critical systems.

Education

Associate of Science in Network Engineering at Montana State University, Bozeman, MT

Sep 2013 - May 2018

I've learned how to design, implement, and troubleshoot network infrastructure.
