(221) 792-9206

123 Maple St, Nashville, TN 37206

Over 4 years of experience as a Network Systems Engineer. Proven ability to design, implement, and troubleshoot complex network systems. Strong knowledge of TCP/IP networking protocols and standards. Experienced in working with both Windows and Linux operating systems. Excellent communication and organizational skills

Employment History

Network Systems Engineer at AT&T, TN

Jun 2022 - Present

- Led the design and implementation of a new network infrastructure for a medium-sized company, which resulted in increased efficiency and decreased downtime by 25%.
- Successfully installed and configured routers, switches, firewalls, wireless access points, and other networking equipment from scratch.
- Created custom scripts to automate various tasks related to network administration, saving hundreds of hours of work per year.
- Trained junior staff members on best practices for network troubleshooting and maintenance.
- Documentation of all current systems & future goals.

Network Systems Engineer II at Comcast, TN

Jul 2018 - Apr 2022

- Successfully installed and configured networking hardware for a small business with 10 workstations.
 - Created a secure network using industry best practices that prevented outside access and data breaches.
 - Successfully implemented a VoIP system for a medium-sized business, resulting in decreased monthly phone bills by 35%.
 - Researched, recommended, and successfully implemented new software that increased productivity by 15% among the engineering team.
 - Successfully troubleshooted and resolved over 200 technical issues relating to networks, servers, desktops, and laptops.
-

Education

Bachelor of Science in Network Systems Engineering at Middle Tennessee State University

Aug 2014 - May 2018

I've learned how to design, implement, operate, and troubleshoot networked systems, as well as how to manage network security.
