## Education

### Associate's Degree in Ophthalmic Photography at Central New Mexico Community College, NM

Sep 2014 - May 2019

Some skills I've learned are how to take and process high-quality photographs of the eye, how to maintain and operate ophthalmic photography equipment, and how to communicate with patients.

## Profile

I am an Ophthalmic Photographer with over 3 years of experience in the field. I have a strong passion for photography and a keen eye for detail, which has helped me excel in this role. I have worked with some of the leading ophthalmologists in the country and have gained valuable experience in capturing high-quality images of patients' eyes. I am confident in my ability to produce quality results that meet or exceed expectations, and I am always willing to go the extra mile to get the perfect shot.

## Employment History

### Ophthalmic Photographer at Eye Health Services, NM

Apr 2022 - Present

- Trained new ophthalmic photography technicians in the proper procedures and techniques for taking pictures of patients' eyes.
- Led a team of 3-5 photographers during busy times in order to maintain high quality patient care.
- Consistently produced clear and diagnostic images while adhering to company standards and maintaining a low error rate.
- Demonstrated excellent customer service skills by greeting each patient with a smile and providing them with prompt and professional care.
- Showed initiative by coming up with ideas to improve workflow and increase efficiency in the department.

### Ophthalmic Photographer Trainee at New Mexico Eye Institute, NM

Jul 2019 - Feb 2022

- Trained in various imaging modalities including fundus photography, OCT, and angiography.
- Performed over 500 scans independently with high quality images.
- Assisted in laser procedures such as PRP and YAG capsulotomy.
- Maintained a 98% patient satisfaction rating throughout externship.
- Managed scheduling for 20+ patients per day.
- Demonstrated excellent customer service skills by providing clear instructions to patients.
