

Zeltzin Samora

Requirements Analyst

Profile

I am a Requirements Analyst with over 1 year of experience in the software development industry. I have gained valuable skills and knowledge in eliciting, analyzing, documenting, and validating requirements for various types of software applications. I possess excellent communication and interpersonal skills which allow me to effectively interact with different stakeholders involved in a project. I am proactive and always take initiative to identify potential problems early on so that necessary corrective actions can be taken promptly. As a result of my strong analytical abilities, attention to detail, and commitment to quality workmanship, I have been able to consistently deliver successful projects that meet or exceed customer expectations.

Employment History

Senior Requirements Analyst at Robert Half International, SC

May 2022 - Present

- Led the requirements gathering process for a new software application, resulting in a more efficient and user-friendly product.
- Wrote detailed requirement specifications for 3 major software releases, ensuring that all stakeholders' needs were met.
- Reviewed and revised requirements documents created by junior analysts, providing guidance and mentorship.
- Created use cases, business processes, and other documentation to support the development team.
- Participated in agile sprint planning sessions to provide input on upcoming work items.
- Worked with QA team to develop test plans and ensure adequate testing coverage.

Requirements Analyst at The Charleston Group, SC

Jul 2021 - Apr 2022

- Authored 50+ requirements for various software applications.
- Wrote functional, technical, and user documentation for each requirement.
- Led 3 project teams of 5-7 analysts in the gathering and documenting of business requirements.
- Defined scope and objectives for 12 projects with input from stakeholders across the company.
- Chaired weekly meetings to track progress on assigned projects and remove roadblocks.
- Presented high-level overviews of proposed solutions to executive management.

Education

Bachelor of Science in Computer Science at Clemson University, SC

Sep 2017 - May 2021

I have learned how to design and develop software, how to use computers to solve problems and how to effectively communicate with others.
