(456) 809-4241

1243 Elm Street, Portland, OR 97201

PROFILE

I am a Security Analyst with over 4 years of experience. I have worked in various industries and have gained a wealth of knowledge in security analysis and incident response. I am highly analytical and thrive in fast-paced environments. I have excellent communication skills, both written and verbal, which allows me to effectively communicate complex technical information to non-technical staff. In addition, I possess strong organizational skills that enable me to manage multiple projects simultaneously while meeting deadlines.

EMPLOYMENT HISTORY

● Security Analyst at CrowdStrike, OR

Jun 2022 - Present

- Implemented security protocols that prevented data breaches for a company with over 500 employees.
- Conducted risk assessments for a variety of clients and provided recommendations for mitigating risks.
- Created comprehensive security plans that addressed the needs of each individual client.
- Monitored network activity and identified potential threats for multiple companies.
- Trained new employees on proper security procedures.

● Associate Security Analyst at Symantec, OR

Sep 2018 - Apr 2022

- Led a team of 3 security analysts in conducting analysis of 100GB of data to identify potential security threats.
- Successfully identified and mitigated over 50% of all potential security threats through analyzing system logs, event viewer data, and other various forms of monitoring data sources.
- Wrote custom scripts to automate the process of identifying high-risk user accounts based on failed login attempts which helped reduce the time needed to investigate possible breach incidents by 30%.
- Created comprehensive documentation for all processes related to incident response and threat mitigation which is used as training material for new staff members.
- Implemented a change control management system that was successfully adopted by 95%.

EDUCATION

Bachelor of Science in Cybersecurity at University of Oregon, OR

Aug 2013 - May 2018

I have learned to find and patch security holes in computer systems, to monitor and respond to security breaches, and to create security plans to protect computer systems.
