

Anicia Kozar

Security Consultant

Profile

I am a security consultant with over 5 years of experience in the industry. I have worked with both small and large companies to provide them with comprehensive security solutions. I have a deep understanding of security risks and how to mitigate them. I am also well-versed in compliance requirements and can help my clients ensure that they are meeting all necessary regulations. In addition, I have excellent project management skills and can successfully lead teams through complex projects from start to finish.

Employment History

Senior Security Consultant at Security Solutions, Inc., NH

Apr 2022 - Present

- Led a team of 4 security consultant in conducting vulnerability assessment and penetration testing for a client's network infrastructure and web applications.
- Successfully helped the client patch over 90% of the vulnerabilities identified, which led to an overall decrease in their Cybersecurity risk score by 35%.
- Authored multiple reports detailing findings and recommendations for clients ranging from small businesses to Fortune 500 companies.
- Presented findings to clients, executive leadership teams, and board members on multiple occasions.
- Trained junior consultants on tools, methodologies, and best practices used during engagements.

Security Consultant at The Security Group, Inc., NH

Jul 2017 - Feb 2022

- Conducted a security review for a client with 100 employees and 10 servers. Implemented new security measures that reduced the risk of data breaches by 85%.
- Reviewed the security systems for a client with 500 employees and 50 servers. Made recommendations that increased protection against possible attacks by 95%.
- Led a team of 4 consultants in conducting an audit of a large corporation's security system. The audit uncovered several vulnerabilities which were then addressed, reducing the overall risk to the company by 60%.
- Authored "Best Practices for Security Systems in Small Businesses", published by ABC Publishing Company. This guide has been downloaded over 5,000 times and is used by small businesses all over the country to improve their own security systems.
- Conducted training sessions on information security best practices for executives from companies ranging in size from 50 to 5,000 employees. These sessions have helped educate participants on how they can better protect their organizations from potential threats.
