

Garnette Rozario

Software Developer

Profile

Software Developer with over 1 year of experience in the industry. I have a strong background in Java development and web applications. My skills include object-oriented programming, databases, software design patterns, and test-driven development. I am also experienced in working on Agile teams. In my previous role, I worked on developing a new eCommerce platform for a major retailer.

Employment History

Senior Software Developer at Fiserv, NH

Jun 2022 - Present

- Led a team of 4 software developers in the design, development, and implementation of a new e-commerce platform that increased online sales by 25% within the first 6 months.
- Implemented a continuous integration/continuous deployment (CI/CD) pipeline that reduced release times from 2 weeks to 2 days while also reducing production defects by 15%.
- Developed an automated testing framework that decreased manual testing time for regression tests by 80%.
- Refactored legacy codebase, resulting in 20% performance improvement and 50% reduction in technical debt.
- Designed and implemented RESTful API endpoints used by 3rd party applications, resulting in increased traffic to company website.
- Authored over 10K lines of code across 12 different microservices.

Software Developer at Oracle, NH

Aug 2021 - May 2022

- Developed software that increased productivity by 10% for a team of 12 developers.
- Implemented new features in an existing web application that led to a 5% increase in user engagement.
- Wrote code for a mobile app that was downloaded 100,000 times in its first month.
- Reduced the number of bugs found in production by 30% through better testing and quality assurance practices.
- Created automated scripts that saved the company \$100,000 per year in manual labor costs.
- Led a project to migrate an old legacy system to a newer technology stack, completing it on time and under budget.

Education

Bachelor of Science in Computer Science at Dartmouth College, NH

Sep 2016 - May 2021

I've learned how to design, implement, and evaluate software systems and applications.
