Profile

I am a highly experienced UI/UX Developer with over three years of professional experience. I have developed numerous user interfaces and created engaging user experiences for both web and mobile applications. My skills include wireframing, prototyping, creating visual designs, conducting user research, and leading usability testing sessions. I am also proficient in HTML5, CSS3, JavaScript, jQuery, Bootstrap framework, and Photoshop. In my previous roles as a UI/UX Developer at XYZ Company and ABC Agency respectively; I was instrumental in designing & developing the interface for various high-traffic websites including xyzwebsite.com & abcagency website . Moreover; I successfully led a team of developers in executing an innovative redesign project for one of our clients which resulted in increased customer satisfaction by 20%.

Employment History

UI/UX Developer at Google, MO

Apr 2022 - Present

- Led the design and implementation of a new responsive user interface for the company website which resulted in a 20% increase in web traffic.
- Created an innovative UI/UX design for a mobile app which was downloaded over 1 million times in its first month.
- Successfully implemented UX designs that increased customer satisfaction by 15%.
- Worked with developers to create prototypes for new features or redesigns- this helped reduce development time by 25%.
- Conducted research (usability testing, surveys, interviews) with users to understand their needs and pain points- used this information to improve the overall experience on our site/app.
